Parmeshwar Murmu

Full Stack Web Developer

PROFESSIONAL SUMMARY

Skilled Full Stack Web Developer proficient in MERN stack. Demonstrated expertise in HTML, CSS, JavaScript, React, Node.js, and MongoDB. Hands-on experience in executing projects, emphasizing attention to detail and problem-solving abilities. A collaborative team player committed to delivering impactful solutions.

PROJECT

Food Truck

Created an e-commerce platform where users can purchase groceries like vegetables, fruits, and household items, creating a seamless user experience.

Features:

- User authentication system for secure access to personalized content.
- Search bar allowing users to quickly find specific food items or vendors.
- Responsiveness ensuring optimal viewing experience across different devices.
- Sorting functionality to arrange food items based on specific criteria.
- Filtering options enabling users to narrow down search results based on preferences.

Tech Stack : HTML, CSS, JavaScriptt

Areas of Responsibility:

- Developed the landing page and home page using HTML, CSS, and Javascript.
- Collaborated with team members to ensure consistency in design and functionality.

Successfully completed a solo project within a duration of 5 days.

TravelWiz

A traveling website that allows users to book new destinations and explore new places.

Features:

- User authentication: Secure login and registration for personalized user accounts.
- Sorting, filtering, and search bar: Easy navigation and quick access to desired destinations and travel options.
- Payment page: Seamless and secure payment processing for booking transactions.
- Responsiveness: Website adapts and provides optimal user experience across different devices.

Tech Stack : HTML, CSS, JavaScriptt

Areas of Responsibility:

- Led the team and coordinated project activities to ensure successful delivery.
- Developed and implemented the entire admin page, providing efficient management and control over website content.
- Created and integrated admin-side functionalities, enabling the management of user accounts, bookings, and site settings.

Collaborative project involving 3 members, completed within a 5-day timeframe.
